SETS NEW STANDARD FOR SUPER MATT FINISH

Compared to other similar materials, it sets new standards for the sector for example, with its giant leap forward in super matt technology, which until now has been focused purely on solid colours. The surfaces are available in a number of solid colours as well in a variety of heartwood and sapwood tones, which allow combinations with no limits to creative imagination. According to one of the leading manufacturers of furniture fronts, it is "the best performing super matt finish, setting a new standard in the market."
